Overview

IBM® Cognos® Business Intelligence V10.1 enables business users to access and analyze the information they need to improve decision making, gain better insight, and manage performance. Cognos Business Intelligence solutions include software for query, reporting, analysis, and dashboards, as well as software to gather and organize the information from multiple sources.

With Cognos Business Intelligence software, you can:

- Enable every decision maker -- from executives and line-of-business managers, financial and business analysts, to front line managers, partners and customers -- to make better decisions, faster
- Inform, engage, and align everyone in the organization with collaborative, information-based decision making
 - Inform decision makers with complete, consistent, timely, and relevant information in terms business people understand and trust
 - Engage decision makers to view, assemble, explore, and analyze any and all information how, when, and wherever it is needed
 - Align decision makers to share insight and make decisions and plans in the context of corporate goals
- Drive better business outcomes by freeing the business to develop new insights while providing IT and finance cost-effective control

IBM Cognos Enhanced Encryption for OpenSSL capability is no longer delivered through a standalone, separately purchased component. IBM Cognos Enhanced Encryption for OpenSSL capability has been integrated into IBM Cognos Business Intelligence V10.1. The same capabilities exist as in previous releases of IBM Cognos Business Intelligence 8.

For complete licensing and packaging details, visit

Key prerequisites

Refer to the [Technical information](#) section for details.

Planned availability date

October 27, 2010: Electronic availability

Description

IBM Cognos Business Intelligence V10.1 offers capabilities focused on these key themes.

Analytics everyone can use to answer key business questions

IBM Cognos Business Intelligence V10.1 delivers a unified workspace so individuals can see more and do more by delivering freedom to:

- Easily view, assemble, and personalize information to follow a train of thought and generate unique perspectives
- Explore all types of information from all angles to assess the current business situation
- Analyze facts and anticipate tactical and strategic implications by simply shifting from viewing to more advanced, predictive or what-if analysis

Collective intelligence to connect people and insights to gain alignment

IBM Cognos Business Intelligence V10.1 delivers collaboration and social networking for groups to engage more and align more by giving them freedom to:

- Establish decision networks to share insights and drive toward a collective intelligence
- Provide transparency and accountability to drive alignment and consensus
- Communicate and coordinate tasks to engage the right people at the right time

Actionable everywhere to bring insight to the point of impact

IBM Cognos Business Intelligence V10.1 delivers insight where it is needed so organizations can learn more and impact more by giving them freedom to:

- Adopt mobile to accelerate interactive analysis everywhere
- Address challenges of compressed decision cycles with real-time analytics
- Integrate analytics in everyday work and in workflow to inform business processes

Platform advances to simplify and cost effectively scale enterprise analytics

IBM Cognos Business Intelligence V10.1 lets you:

- Optimize performance with in-memory analytics
- Accelerate model design with guided workflow-driven modeling
- Enhance system management with more granular visibility and control
- Streamline lifecycle management with the ability to seamlessly upgrade

IBM Cognos Business Intelligence

Business users want to access and utilize the information that drives their decision processes in a simple visually compelling application. They need a level of capability that suits their needs, but can be expanded as skills and information requirements change.

IBM Cognos Business Insight

IBM Cognos Business Insight provides an integrated business intelligence experience for business users. This web-based tool allows you to use IBM Cognos content to build sophisticated interactive dashboards that facilitate collaborative decision making. These dashboards can include traditional business intelligence assets,

along with IBM Cognos Real-time Monitoring information, TM1® Websheets, and CubeViews, as well as external data.

IBM Cognos Collaboration

The new collaboration capabilities in IBM Cognos Business Insight support business users by providing a bridge between using IBM Cognos Business Intelligence to discover a business problem and acting to resolve it. Activities is a web-based collaboration tool for collecting, organizing, sharing, and reusing work related to a goal. Members of an activity interact in an online location in which they create, collect, and share a set of ideas and resources to support a goal. An activity is a way for you to organize your work and collaborate with others in a shared web space. Because it is easy to invite new members, you can quickly gather the right people and resources you need to get the job done. You can post messages, share files and links to websites, and create and assign to-do items. These activities are part of IBM Lotus® Connections and are integrated with IBM Cognos Business Insight.

IBM Cognos Statistics

IBM Cognos Statistics, powered by IBM SPSS, provides analysts with the ability to distribute reports with statistical insight to the larger business community, further expanding the breadth of reporting capabilities provided by IBM Cognos software. Because IBM Cognos Statistics is seamlessly integrated into IBM Cognos Report Studio, analysts no longer need to extract standardized trusted data from their business intelligence (BI) data warehouse into a separate tool to conduct and report on statistical information. Analysts can now easily assemble reports containing statistical information and distribute the information across the enterprise saving valuable time. The statistical capabilities provided by IBM Cognos Statistics are powered by the trusted market leading IBM SPSS statistical engine, enabling you to make the most of best-in-class analytics within your organization.

IBM Cognos Software Development Kit

Cognos Software Development Kit opens up capabilities for integration and extension in web-based enterprise applications. Using an open XML-based interface and fully documented SDKs, application developers and system integrators can incorporate Cognos content into any application or environment, using common protocols such as HTTP, WSDL, SOAP, and XSLT.

IBM Cognos Business Intelligence PowerPlay®

Cognos Business Intelligence PowerPlay lets users analyze large volumes of data with sub-second response times. Fast analysis lets companies quickly get to the "why" behind an event or action, so they can take effective steps to address it.

IBM Cognos Mobile

IBM Cognos Mobile provides timely and convenient access to IBM Cognos Business Intelligence information from a mobile device. This provides decision makers with access to business-critical information wherever they are and whenever they need it.

IBM Cognos Data Manager

Cognos Data Manager provides open data access that enables access to data wherever it resides using published interfaces across transaction systems, warehouses (relational and OLAP), flat, legacy, or modern sources. Cognos Data Manager is designed for high performance information access. It optimizes data merging, extraction, transformation, and dimensional management to deliver data warehouses ready for business reporting and analysis.

IBM Cognos Reporting

IBM Cognos Reporting enables you to make smarter business decisions by providing a comprehensive set of reporting capabilities and access to the information you need.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

For complete details concerning the minimum hardware requirements to install and run IBM Cognos software, refer to the Installation and Configuration Guide for each product. The Installation and Configuration Guide can be found at

<http://publib.boulder.ibm.com/infocenter/cbi/v10r1m0/>

Software requirements

For complete details concerning the minimum software requirements to install and run IBM Cognos software, refer to the Installation and Configuration Guide for each product. The Installation and Configuration Guide can be found at

<http://publib.boulder.ibm.com/infocenter/cbi/v10r1m0/>

Software environment statement

IBM Cognos product strategy includes leveraging industry-standard platforms such as operating systems, databases, and application servers. In order to provide the best service possible, IBM certifies each of our products to run on specific versions of these platforms. For complete details concerning supported software environments for IBM Cognos software, visit

<http://www-01.ibm.com/support/docview.wss?uid=swg27014782>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a Release Note file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of

Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only**. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.
- Express and workgroup programs may be licensed with maximum use terms. In that case, the following applies. The maximum authorized use terms and conditions for PVU licensed IBM express and middleware programs can be found in the IBM Express and Middleware Licensing Guide.

Cross-platform products

Cross-platform product for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and PoE govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form numbers

Program name	Program number	Form number
IBM Cognos Business Intelligence	5724-w12	L-AMIR-86HJFW
IBM Cognos Business Intelligence PowerPlay	5724-w68	L-AMIR-86HHZM
IBM Cognos Business Intelligence Reporting	5724-w19	L-AMIR-86HJ2D
IBM Cognos Data Manager	5724-w13	L-AMIR-86HJ2V
IBM Cognos Mobile	5724-w20	L-AMIR-86HJ5T

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional

charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes. For additional information refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

International Passport Agreement

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest

versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your

questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner, or authorized IBM Business Partner for Software ValueNet®, if applicable. Additional information is also available at
