At a glance

IBM® FileNet® Business Process Manager V5.0 enables improved case management outcomes and agile Enterprise Content Management by delivering comprehensive content and content-centric business process management capabilities to address the creation, management, and optimization of unstructured content, related business processes, and user interfaces. This release offers:

- Improved customer experiences through architectural enhancements
- Improved consumability with simplified install process
- Usability improvements enabling multiple instances of the Process Engine on a single server
- Optimization advancements in real-time monitoring through IBM Cognos® technology
- Comprehensive business process support for IBM Case Manager

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

Organizations continue to have exponentially growing digital content, documents, unstructured content and complex business processes that form the foundation of business operations. While rapidly changing market conditions demand organizations quickly adapt, optimize their business, and lower cost, this growth in unstructured content, manual or non-streamlined business processes and related challenges become major impediments to a company's success. An Agile Enterprise Content Management (ECM) platform combining Enterprise Content Management and Business Process Management (BPM) delivers flexibility to help increase business agility.

IBM FileNet Business Process Manager V5.0 enables Agile ECM by delivering comprehensive content and BPM capabilities to address the creation, management, and optimization of unstructured content, related business processes, and user interfaces. This offering continues to build upon a composite application environment and enterprise readiness with features to expand performance, improve consumability, and speed time to value.

Key prerequisites

For details, refer to the [Technical information](#) section.

Planned availability date

- November 19, 2010: Electronic availability
- December 16, 2010: Media availability

Description

IBM FileNet Business Process Manager V5.0 is designed to deliver tight integration between ECM and BPM. Content becomes the essential information asset in business processes to help support better business outcomes. The Active Content capability can be used to automatically provide decision makers the right information at the right time in the context of important decisions, helping to reduce errors and time wasted searching for information.

The Agile ECM Framework offers a flexible and agile user experience and the latest innovations in Web 2.0 contextual collaboration and composite application technology. With the ability to address business user and IT requirements, this standards-based framework delivers a flexible and configurable application experience to the business user while allowing IT specialists and administrators to react more quickly to changing business requirements through the reuse of common business components and services.

IBM FileNet Business Process Manager includes:

- Simulation, analysis, and tuning tools that can be used for continuous process improvement, helping to optimize business performance
- Forms, widgets, and composite applications to support configurable displays with data feeds from various local, departmental, enterprise, and external sources
- Enhanced integration capabilities with IBM Case Manager
- Compliance related capabilities enable users to keep track of process steps, user interactions, content changes and access controls for greater accountability

This open and extensible architecture can help reduce time-to-value and enables dynamic integration with many essential information sources such as multiple content repositories, process engines, data applications, feeds, and social networking tools.

IBM FileNet Business Process Manager V5.0 features

Architectural enhancements

- A design that delivers performance improvements on all supported platforms
- Consistency through Java™ technology, with P8 Content and Application Engines and Workplace™ XT™
- Improved serviceability through standard database access and debugging tools
- Support for IBM Case Manager business process execution requirements, analytics and reporting

Process Engine support for Linux® (SUSE and RedHat)

- Process Engine has the ability to support Linux and zLinux so that uniform operating system support is achieved across the P8 Process, Content, and Application Engines and Workplace XT.

Process Engine multi-tenancy

- Supports multiple instances of the Process Engine on a single server

New system counters improve the monitoring of system performance and operation.

- There are new counters tracking counts and durations for server processing activities. New database counters are added to track connections, transactions, and SQL statements. Counters are added to track user and group related calls. In addition to tracking duration of Remote Procedure Calls, percentage of time spent in database activity is now accumulated.

Improved and simplified installation

- Simplified and faster installation with fewer number of installation screens
- Installer no longer requires root privilege on UNIX®

Cognos Real-time Monitoring support

- Process Monitor has been renamed Case Monitor and enhanced to support advanced case monitoring features for use with IBM Case Manager.
- Case Monitor is now integrated with the latest version of Cognos Real-time Monitoring. Cognos Real-time Monitoring has replaced Cognos Now|.

Improved Case Analyzer support

- Process Analyzer has been renamed Case Analyzer and has been enhanced to support case analytics for use with IBM Case Manager.
- New support for Cognos BI client for Web-based Case Analyzer reports as an alternative to Microsoft® Excel-based reporting.

Improved international language support for:

- UNICODE and GB18030 character handling
- UI Mirroring for bi-directional languages

Support for Federal Information Process Standard FIPS 140-2

- FIPS 140-ready mode support for the Federal Information Processing Standards (FIPS) 140-2 standard has been added in FileNet Business Process Manager V5.0. BPM-related passwords are encrypted with FIPS-approved encryption algorithms provided by IBM JCE FIPS. The FIPS-required for secured transport via TLS is enabled via HTTP Tunneling.

IBM FileNet Business Process Manager V5.0 includes the following:

- IBM FileNet Content Manager
- IBM Enterprise Content Manager Widgets
- IBM FileNet Case Analyzer
- IBM FileNet Process Designer
- IBM FileNet Case Monitor
- IBM FileNet Process Simulator
- IBM FileNet Business Process Framework
- IBM FileNet Connector for Microsoft Visio
- IBM FileNet eForms for P8
- IBM FileNet P8 Platform: Content Engine, Process Engine, and Application Engine

Additional bundled IBM software components with limited use license terms:

- IBM Cognos Real-time Monitoring V10.1
- IBM DB2® Workgroup Server Edition V9.7
- DB2 Enterprise Server Edition V9.7
- IBM Mashup Center with InfoSphere™ Mashup Hub V2.0
- IBM WebSphere® Application Server V7.0
- IBM Content Integrator V8.5.1

DB2 Workgroup Server Edition V9.7 and DB2 Enterprise Server Edition V9.7 offer significantly increased data protection, scalability and performance for all database intensive operations which, based on DB2 technology, are designed to manage data more effectively and efficiently. Greater availability is delivered through enhancements such as online, automated database reorganization. In addition, the increased scalability and the ability to leverage the latest in server technology help deliver increased performance of backup and recovery processes.

IBM FileNet Business Process Manager Starter Pack is also available as part of an ECM initiative, which can help you to more cost-effectively implement ECM solutions. This full-featured ECM product provides you with out-of-the-box enterprise capabilities in tiered user license configurations for smaller and departmental deployments.

The ECM Starter Pack portfolio consists of four offerings:

- IBM Content Manager Starter Pack
- IBM FileNet Content Manager Starter Pack
- IBM Content Collector Discovery Analytics Starter Pack
- IBM FileNet Business Process Manager Starter Pack

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM Web site

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the U.S. Rehabilitation Act

IBM FileNet Business Process Manager is capable as of December 16, 2010, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following Web site

http://www.ibm.com/able/product_accessibility/index.html

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Specified operating environment

Hardware requirements

The exact configuration needed to support your environment with satisfactory response time varies depending on the size of the objects you are working with and other factors. Individual display response times vary depending on workstation speed, memory, size of objects, and network and server workload.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software ValueNet®.

Charge metrics definitions

The subject programs have a new structure for licensing and pricing designed for clarity, simplicity, and unity with other products in the IBM Enterprise Content

Management portfolio. The former approach relied upon licensing servers and users -- with users licensed on a Named, Concurrent, e-business, Employee, and External basis. This has been replaced with a new approach based on Value Units (VUs), with a primary focus on user access.

Value Unit: Value Unit (VU) is the unit of measure by which this program is licensed. VU entitlements are based on the quantity of a specific designated measurement, either users or resources, for the given program. A proof of entitlement (PoE) must be obtained for the appropriate number of VUs required for your environment as defined by the specific program terms. The VU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with VU entitlements of another program. To understand these benefits of VU V licensing, and to determine how many VU Value Units to obtain for the program, contact your IBM representative.

IBM FileNet Business Process Manager (FileNet BPM) is available in one the following User Value Units (UVU):

- **Authorized User Value Unit (AUVU):** For selective licensing of users who are internal to the organization
- **Employee User Value Unit (EUVU):** For collectively licensing all employees and agents who act on behalf of the organization
- **External User Value Unit (XUVU):** For licensing of users who are external to the organization
- **Authorized User:** An individual (named or unnamed) within or outside of the customer enterprise permitted to access the ECM software and components in any manner directly or indirectly through any means
- **Starter Pack User Value Unit (SP AUVU):** For selective licensing of users who are internal to the organization per parameters set forth in the SP AUVU license conversion table and subject to additional restrictions

Employee User: All employees of the company/subsidiary must be licensed, even if only a subset of the employees are actual users. Agents and contractors acting on behalf of the customer count as employees. At all times, both the number of Employee UVU entitlements and the number of Add-On Employee UVU entitlements must meet or exceed the total employee head count of the customer enterprise. EUVU cannot be mixed with AUVU for the same product.

External User: External users are generally the customer's customers who will need infrequent, read-only access to the program. License may only be used by persons who are not employees, agents, or contractors of the customer affiliates or subsidiaries.

Add-On User License: Grants user access to incremental product capability in IBM FileNet Business Process Manager, given that user is already licensed for the appropriate base functionality (for example, IBM FileNet Content Manager, IBM FileNet Content Manager Starter Pack, IBM Content Manager, and IBM Content Manager Starter Pack).

Starter Pack User: The following restrictions apply:

1. You may not use an IBM FileNet BPM Starter Pack with a repository that at any time shares an object store and a configuration database with another repository.
2. You may only use an IBM FileNet BPM Starter Pack in conjunction with one (1) repository.
3. You may use an IBM FileNet BPM Starter Pack Add-On in conjunction with up to two repositories: IBM FileNet Content Manager, IBM FileNet Content Manager Starter Pack, IBM Content Manager, or IBM Content Manager Starter Pack.
4. The maximum number of SP AUVUs that the licensee may use in conjunction with a given ECM Starter Pack, including IBM FileNet BPM Starter Pack and IBM FileNet BPM Starter Pack Add-On, at any time is 790 (the "Maximum BPMSP Utilization Level").

Trade-up License means an entitlement that enables a licensee to exchange a license of one IBM FileNet BPM Starter Pack to a license of the IBM FileNet

Business Process Manager Program product at a specific price; a licensee may exchange a license of one IBM FileNet BPM Starter Pack Add-On to a license of the IBM FileNet Business Process Manager Add-On Program product at a specific price. Once a Trade-up License is obtained with respect to a given FileNet BPM Starter Pack or FileNet BPM Starter Pack Add-On, the IBM FileNet Business Process Manager Program license that the licensee receives replaces the licensee's original entitlement to the FileNet BPM Starter Pack or FileNet BPM Starter Pack Add-On and the licensee has no further right to use the Starter Pack.

For each Authorized User accessing the FileNet BPM Starter Pack or FileNet BPM Starter Pack Add-On (collectively as Starter Pack), licensee must have the number of AUVU entitlements set forth in the IBM FileNet Business Process Manager Starter Pack or IBM FileNet Business Process Manager Starter Pack Add-On Authorized User Value Unit License conversion table that corresponds to the number of Authorized Users accessing the Starter Pack at any time. At no time may the number of Authorized Users accessing the Starter Pack or any component of the Starter Pack in any manner, directly or indirectly or through any other means, exceed licensee's entitlement to use the Starter Pack, as indicated on the applicable PoE.

In the event licensee reaches the Maximum SP Utilization Level with respect to a given IBM FileNet BPM Starter Pack or IBM FileNet BPM Starter Pack Add-On, if licensee wishes to increase their entitlement to use the Starter Pack, licensee must contact an IBM representative or an IBM Business Partner to purchase a Trade-up License at the then-current rates for such license. Additional charges, such as the cost of the additional licenses, will also apply.

Product pricing

Each product has a fixed price per UVU. Customers license the appropriate number of UVUs to provide access to a corresponding user population.

Cumulative volume discounting

As the user quantity increases, the number of UVUs increase albeit at a slower rate. Value Unit license conversion tables establish the required number of UVUs for a specified number of users. Volume discounting examples:

- 100 authorized users require 85 AUVUs.
- 1,000 authorized users require 600 AUVUs.
- 5,000 authorized users require 2,500 AUVUs.

Content Manager configuration example:

- Content Manager AUVU price = \$Y per AUVU
- 5,000 authorized users require 2,500 AUVUs
- Total price = \$Y x 2,500

Resource Value Units

Three types of Resource-based Value Units (RVUs) are available for licensing select products and options:

- Pages Per Month Resource Value Units (PRVUs) are perpetual licenses to install and run the licensed program on one or more scanner stations or computer devices and to process up to a defined number of pages per calendar month.
- Terabyte Resource Value Units (TRVUs) are perpetual licenses to store up to a defined number of terabytes of content on Image Services storage devices and supported P8 Fixed File Stores.
- Processor Value Unit (PVU) licensing for Distributed software comprises perpetual licenses for each processor core on which the software is deployed. More information about PVU licensing can be found at this location

http://www-306.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

Although the subject programs are now offered under a new, streamlined licensing and pricing model, the function of the products has not changed from that of previously available offerings.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
IBM FileNet Business Process Manager	5724-R76	L-YYAG-893NW4

The program's License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the Program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all Program defects. You are responsible for the results obtained from the use of the Program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.
