## At a glance

A major portfolio-wide release of IBM® Rational® Application Security offerings is now complete with the availability of IBM Rational AppScan® Source Edition and IBM Rational AppScan Build Edition. Both editions are upgraded to Version 8.0 with significant enhancements to best-in-class static analysis security testing enabling greater accuracy and visibility to application vulnerability assessment at coding and build stages of application development.

Highlights of IBM Rational AppScan Source Edition and AppScan Build Edition include:

- Support for hybrid analysis
- Localization for nine languages
- Extended application framework support
- IBM Research static analysis innovation

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL, Reference: AE001

## Overview

A major portfolio-wide release of IBM Rational Application Security offerings is now complete with the availability of IBM Rational AppScan Source Edition and IBM Rational AppScan Build Edition. IBM Rational AppScan Source Edition and AppScan Build Edition are being upgraded to Version 8.0 with significant enhancements to best-in-class static analysis security testing enabling greater accuracy and visibility to application vulnerability assessment at coding and build stages of application development.

IBM Rational AppScan Source Edition helps avert a data breach by finding security flaws in the source code of networked applications. Security teams can strengthen application security, protect confidential data, and improve compliance. Combining this source code testing tool with web application security scanning delivers the most comprehensive coverage for addressing vulnerabilities in applications.

Building on advantages of accuracy, performance, and centralized management, highlights of IBM Rational AppScan Source Edition and AppScan Build Edition new releases include:

- Support for automated correlation of static and dynamic analysis results (hybrid analysis) with AppScan Enterprise and AppScan Reporting Console (Java™ only)
- Localization supporting nine languages
- New extensible application framework support providing unparalleled flexibility to support new frameworks
- IBM Research innovation in String Analysis, providing simplicity for developers with automated identification of validation routines
- Additional defect tracking system integrations
- Expanded platform support
- Auditing support

The IBM Rational AppScan portfolio is a fundamental component of the IBM Secure Engineering framework enabling organizations to benefit from the ability to design security into their business. IBM Security Solutions means secure by design.

---

## Planned availability date

---

- November 23, 2010: Electronic availability
- November 30, 2010: Media availability

---

## Description

---

### IBM Rational AppScan

The most efficient way to stay ahead of application security vulnerabilities is to build software securely, from the ground up. The challenge is that the majority of developers are not security experts, and secure coding is historically not identified as a priority. As a result web-based and non-web based applications alike continue to be deployed riddled with vulnerabilities ready for exploitation, easily risking sensitive data to a breach.

The onerous task of vulnerability identification and remediation cannot be successfully addressed by limited IT security resources. So, the best way to engage development in the process of application security is to provide them with tools that fit into their existing environment and workflow, and that generate results in a language they understand. The IBM Rational AppScan portfolio offers a host of offerings to enable application security testing across the application lifecycle.

IBM Rational AppScan is a leading application security testing suite designed to help manage vulnerability testing throughout the software development life cycle. AppScan offers a time-saving solution for all types of security testing - outsourced, individual, and enterprise-wide analysis - and for all types of users - application developers, quality assurance (QA) teams, penetration testers, security auditors, and senior management.

AppScan offerings include analysis techniques to traverse an application or its source code, analyzing and testing the application or its code, validating the findings, and then reporting results. The reports generated include recommendations to fix the problems. These advanced fix recommendations educate and help developers and

security auditors to address and remediate the vulnerabilities identified during the scan.

IBM Rational AppScan Source Edition helps avert a data breach by finding security flaws in the source code of applications. Security teams can strengthen application security, protect confidential data, and improve compliance. Combining this source code testing tool with web application security scanning provides the most comprehensive coverage for addressing vulnerabilities in applications.

**IBM Rational AppScan Editions in this announcement include:**

- **IBM Rational AppScan Source Edition** provides a comprehensive approach to security source code analysis (static analysis), with fast scans and actionable information to quickly get the reports and remediation advice required to find and eliminate vulnerabilities in applications
- **IBM Rational AppScan Build Edition** enables both static and dynamic analysis for security testing to be automated through testing in the build environment providing the benefits of full application testing coverage early in the application development process.

**Key capabilities of IBM Rational AppScan static analysis** include the ability to:

- Create, distribute, and enforce consistent policies and empowers enterprise-wide metrics and reporting with a centralized policy and assessment database
- Accommodate a broad portfolio of the largest and most complex applications across a wide range of languages.
- Build automated security into development by seamlessly integrating security source code analysis with automated scanning during the build process
- Facilitate collaboration between security and development by offering flexible triage and remediation that automates flow of information between these teams
- Allow an accurate and efficient way to certify outsourced applications by building security requirements into outsourcing contracts and leveraging IBM Rational AppScan Source Edition to validate that acceptance criteria have been met
- Provide options for security, development, and remediation types of users
- Allow security teams to scan, triage, manage security policies, and prioritize the assigning of results for vulnerability remediation
- Allow development teams to pinpoint vulnerabilities and provide precise, detailed remediation advice for rapid fixes, within the developer IDE
- Enable development teams to review vulnerabilities and apply appropriate security fixes and eases remediation

**IBM Rational AppScan Source Edition V8.0** includes the following enhancements:

- Support for automated correlation of static and dynamic analysis results (hybrid analysis) with AppScan Enterprise and AppScan Reporting Console (Java only)
- Full product localization into Chinese (simplified), Chinese (traditional), Korean, Portuguese (Brazil), Japanese, German, French, Italian, and Spanish
- Introduction of the first extensible application framework providing unparalleled flexibility to support new frameworks - a framework for frameworks - made possible with the creation of a new specification called Web Application Flow Language (WAFL)
- IBM Research innovation in String Analysis, providing simplicity for developers with automated detection of user and system defined validation routines to not only properly identify the use of these routines, but to verify they are coded properly. This capability enables a higher degree of accuracy by reducing both false positives and false negatives, streamlines the security analysis triage and reduces the need to write custom rules representing validation routines.
- Additional defect tracking system integrations with IBM Rational Team Concert™ and Microsoft® Team Foundation Server
- Expanded platform support for Windows® 7 and Windows Server 2008 operating systems and Eclipse 3.6 integrated development environment

- Auditing support for specific operations around authentication, user management, assessment management, customer rules and scan rules

**IBM Rational AppScan Build Edition V8.0** includes the following enhancements:

#### Static analysis engine

- Support for automated correlation of static and dynamic analysis results (hybrid analysis) with AppScan Enterprise and AppScan Reporting Console (Java only).
- Full product localization into Chinese (simplified), Chinese (traditional), Korean, Portuguese (Brazil), Japanese, German, French, Italian, and Spanish.
- Introduction of the first extensible application framework providing unparalleled flexibility to support new frameworks - a framework for frameworks - made possible with the creation of a new specification called Web Application Flow Language (WAFL).
- IBM Research innovation in String Analysis, providing simplicity for developers with automated detection of user and system defined validation routines to not only properly identify the use of these routines, but to verify they are coded properly. This capability enables a higher degree of accuracy by reducing both false positives and false negatives, streamlines the security analysis triage and reduces the need to write custom rules representing validation routines.
- Additional defect tracking system integrations with IBM Rational Team Concert and Microsoft Team Foundation Server.
- Expanded platform support for Windows 7 and Windows Server 2008 operating systems and Eclipse 3.6 integrated development environment.
- Auditing support for specific operations around authentication, user management, assessment management, customer rules and scan rules.

#### Dynamic Analysis engine

- Hybrid Analysis - leveraging static and dynamic analysis for detecting client-side JavaScript™ vulnerabilities
- Enhanced scanning for JavaScript, AJAX and ActionScript3-based Flash/Flex applications
- Enhanced support for SOA (Web Services Security: WS-Security v1.1 support, Improved Microsoft .NET framework support, and WS-Addressing 2004 and 2006 support)
- Improved scan configuration with automatic website rewriting
- Defect tracking system integrations with IBM Rational ClearQuest® and HP Quality Center
- Enhanced cookie testing
- New platform support: Windows 2008 Server R2 (in 32-bit mode)

## Technical information

---

### Specified operating environment

---

#### **Hardware requirements**

For IBM Rational AppScan Source Edition

- Processor: Intel® Pentium® P4, 3.0 GHz or faster
- Memory: 2 GB RAM minimum
- Disk Space: 1.5 GB (2 GB required for installation)
- Network: 1 NIC 10 Mbps for network communication with configured TCP/IP (100 Mbps recommended)
- Drives: CD-ROM or DVD-ROM drive

For IBM Rational AppScan Build Edition static analysis engine

- Disk Space: Approximately 30 GB of available hard-disk space
- Memory: 2 GB of RAM or more recommended
- NIC Network driver: 1 NIC 100 Mbps for network communication with configured TCP/IP
- Processor: 2.4-GHz Pentium IV-compatible processor

#### **Software requirements**

For IBM Rational AppScan Source Edition and IBM Rational AppScan Build Edition static analysis engine

Operating systems

- Microsoft Windows 7 Professional, Enterprise and Ultimate 32 and 64-bit (in 32-bit mode)
- Microsoft Windows XP Professional (SP2, and higher)
- Microsoft Windows Vista Business, Enterprise and Ultimate (SP1) 32- and 64-bit (in 32-bit mode)
- Microsoft Windows Server 2003 Enterprise (SP2, and higher)
- Microsoft Windows Server 2008 Enterprise
- Microsoft Windows Server 2008 R2 Enterprise (in 32-bit mode)
- Red Hat Enterprise Linux® 4.0 Workstation and Server
- Red Hat Enterprise Linux 5.0 Workstation and Server 32- and 64-bit (in 32-bit mode)
- Solaris 9 (IBM Rational AppScan Source Edition for Automation only)
- Solaris 10 (IBM Rational AppScan Source Edition for Automation only)

Project files

- Visual Studio .NET 2003
- Visual Studio 2005
- Visual Studio 2008
- WebSphere® Studio
- Application Developer 5.1
- Eclipse 3.1, 3.2, 3.3, 3.4, 3.5, and 3.6
- IBM Rational Application Developer V6.0, V7.0, V7.5, and V8.0

## Compilers

- GNU compiler Collection (gcc) for Linux
- Microsoft Visual Studio 6.0 (V6)
- Visual Studio.NET (V7, Visual Studio .NET 2003 (V7.1))
- Visual Studio 2005 (V8) for Windows
- Visual Studio 2008
- Sun Studio C
- C++ Compilers for Linux and Solaris

## Language support

- Java
- ClientSide JavaScript
- JSP
- ColdFusion
- C
- C++
- .NET (C#, ASP.NET, and VB.NET)
- Classic ASP
- JavaScript/VBScript
- HTML
- PHP
- Perl
- VisualBasic 6

## IDE support

- Eclipse versions 3.3, 3.4 and 3.5, 3.6
- IBM Rational Application Developer V7.0, V7.5, and V8.0
- Visual Studio .NET 2003, 2005, and 2008

## Defect Tracking System support

- IBM Rational ClearQuest V7.0, V7.1.1
- HP Quality Center 9.2
- IBM Rational Team Concert 2.0.0.2
- Microsoft Team Foundation Server 2008

## IBM Rational AppScan Build Edition dynamic analysis engine

## Development Tools - Microsoft .NET Framework 2.0 SP1

Web browsers - Microsoft Internet Explorer 6.0 and future releases, mod levels, and fix packs

## Operating systems

- Windows XP: Professional, SP2 and SP3
- Windows 2003: Standard and Enterprise, SP1 and SP2
- Windows Vista: Business, Ultimate and Enterprise, SP1 and SP2
- Windows Server 2008: Standard and Enterprise, SP1 and SP2
- Windows 2008 R2: Standard and Enterprise
- Windows 7: Professional, Enterprise, and Ultimate

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

## Planning information

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

### Packaging

IBM Rational AppScan

## Security, auditability, and control

---

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

## Ordering information

---

This product is only available via Passport Advantage. It is not available as shrinkwrap.

## Charge metrics definitions

### Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

### Install

Install is a unit of measure by which the program can be licensed. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the program.

## Cross-platform products

---

### **Cross-platform product for use on System z**

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

---

**Terms and conditions**

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

## **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

### **License Information form number**

Program name	Program number	Form number
IBM Rational AppScan Source Ed for Automation	5724-Z34	L-KHUY-894S9U
IBM Rational AppScan Source Ed for Core	5724-Z33	L-KHUY-894S9U
IBM Rational AppScan Source Ed for Developer	5724-Z36	L-KHUY-894S9U
IBM Rational AppScan Source Ed for Remediation	5724-Z37	L-KHUY-894S9U
IBM Rational AppScan Source Ed for Security	5724-Z35	L-KHUY-894S9U
Rational AppScan Build Edition	5724-Z71	L-KHUY-894SAS

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the Program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the

discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### **Money-back guarantee**

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

### **Volume orders (IVO)**

No

### **Passport Advantage applies**

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

### **Usage restriction**

Yes. For additional information refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Software Subscription and Support (Software Maintenance)**

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of

programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

**System i Software Maintenance applies**

No

**Educational allowance available**

Not applicable.
