At a glance

IBM® Rational® Rhapsody® Design Manager and IBM Rational Software Architect Design Manager enhance the IBM Rational architecture and design solutions with Collaborative Design Management capabilities built on the Jazz™ platform.

- Take team collaboration to new heights by integrating design into the application and systems engineering lifecycles
- Maximize productivity and lower costs with a central hub to store and access designs
- Collaborate with stakeholders on software architectures, deployment plans, and system designs
- Shorten time-to-market and improve quality with integrated design reviews

Overview

Architectures, models, and designs help teams address the growing complexity of today's software and systems. Getting the design right is critical to helping teams break down the complexity to manageable pieces and reducing costly rework later. However, all too often, design teams work in silos that lead to costly errors uncovered late in the lifecycle.

With market-leading IBM architecture and design solutions, IBM Rational Software Architect and IBM Rational Rhapsody are now enhanced with new Collaborative Design Management capability with the introduction of IBM Rational Rhapsody Design Manager and IBM Rational Software Architect Design Manager.

Built on the Jazz platform, this Collaborative Design Management capability enables software and systems teams to integrate design into their overall application and systems engineering lifecycles, and to collaborate on designs across organizational boundaries, disciplines, supply chains, and domains. Organizations can use design more effectively in managing complexity, mitigating risk, and improving the overall quality, time, and agility of their software and systems planning, design, and delivery.

For ordering, contact your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: YE001

Key prerequisites

Planned availability date

June 23, 2011: Electronic availability

July 4, 2011: Media availability

Description

Organizations are facing increasing challenges to rapidly deliver on their business needs in the face of growing complexity in the IT application and systems they are delivering, and in the development processes and environments that they operate. IBM Rational Rhapsody Design Manager and IBM Rational Software Architect Design Manager provide Collaborative Design Management capabilities that enhance the IBM industry leading design solutions for systems engineering and IT applications and transforms how teams manage and collaborate on designs.

This new Collaborative Design Management capability includes:

Design Management Server Built on the Jazz Platform

- Teams can store and manage different types of architectures, designs, and models in a central location easily accessible by design teams and extended stakeholders.
- Team members can be confident they are working with the latest version of the design. Snapshots also allow team members to refer to previous versions of the design.
- Designs can be imported from the file system or a software configuration management system and organized into projects. Initial support is provided for importing and managing designs created by IBM Rational Software Architect and IBM Rational Rhapsody.

Enterprise and system wide searching

- Teams can search through all of an organization's software and systems designs for review, analysis, and potential reuse.

Web client

Stakeholders can search, navigate, access, and review designs through a web client. This improves the ability of stakeholders to participate in the design process by eliminating the need for stakeholders to have desktop design tools installed on their workstations and allowing self serve access to the latest designs

Collaborating on designs

- Software architects, deployment planners, systems engineers, and software engineers can collaborate on designs with stakeholders from other teams for design correctness, alignment with requirements, feasibility, and compliance to organizational standards.
- Design management automates a review cycle by allowing stakeholders to provide comments and mark-up the actual designs
- Comments and mark-ups are saved with the designs and can be easily accessed by the software architect or system engineer in their IBM Rational Software Architect or Rhapsody client.

Application Lifecycle Management (ALM) and systems engineering lifecycle integration

- Teams can link designs and design elements to other designs and lifecycle data via Open Services for Lifecycle Collaboration (OSLC), providing design traceability and impact analysis.
- Designs can be linked with work items in IBM Rational Team Concert™ so other team members can easily find the designs related to their work.

Dependency analysis

The Relationship Diagram allows users to select a design element and visually explore its relationships to other designs, design elements, and lifecycle data

Dashboards

- Dashboards provide team members with a live view to follow design management and other lifecycle activities through a web dashboard.
- Design Management dashboards can include dashboard viewlets from other other Jazz-based products to provide a dashboard that provides a consolidated view into the overall lifecycle.

Document generation and reporting

- Easily create comprehensive documentation for specifications, communication, compliance, and auditing when used in conjunction with IBM Rational Publishing Engine (purchased separately).
- Documents can include designs, information about design reviews and comments.
- Documents can show the impact of design changes on other lifecycle resources leveraging the OSLC links.

IBM Rational Rhapsody Design Manager and IBM Rational Software Architect Design Manager offer two role based licenses:

- Design Manager
- Design Reviewer

The Design Manager role is designed for team members who are using IBM Rational Software Architect or Rhapsody to create and modify designs and need to update those designs on the Design Management server, create snapshots, and to conduct design reviews. The Design Reviewer role is for stakeholders who need to collaborate, search, view, and review designs but do not create or modify the designs directly.

IBM Rational Software Architect Design Manager V3.0 and IBM Rational Rhapsody Design Manager V3.0 significantly offer increased data protection, scalability and performance for all their database intensive operations which, based on IBM DB2® technology, is designed to manage data more effectively and efficiently. In addition, the increased scalability and the ability to leverage the latest in server technology helps deliver increased performance of backup and recovery processes.

Section 508 of the U.S. Rehabilitation Act

IBM Rational Rhapsody Design Manager and IBM Rational Software Architect Design Manager are capable as of July 4, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Specified operating environment

Hardware requirements

Server hardware requirements

Disk space: 80 GB or more of disk space.

The amount of disk space required depends on the amount of information stored in the server. Swap space equal to twice the physical memory is recommended. An additional 1 GB of disk space and 500 MB for temporary space is required for installation.

Display: A display monitor with at least 1024 x 768 color resolution using 256 colors.

Memory: At least 2 GB RAM (4-8 GB is recommended). More memory improves performance. The minimum memory depends on the number of concurrent users, the amount of data being requested, and the size of the database.

Processor: Server environments - The server requires a 2-core to 4-core CPU.

Software requirements

Server software requirements

Supported operating systems

- Microsoft® Windows® Server 2003 Standard (x86-32)
- Microsoft Windows Server 2008 Standard, Service Pack 2 (x86-32 and x86-64)
- Microsoft Windows Server 2008 Enterprise, Service Pack 2 (x86-32)
- Microsoft Windows Server 2008 R2 Enterprise (x86-64)
- SUSE Linux® Enterprise Server 10 (x86-32 and x86-64)
- RedHat Enterprise Linux 5 (x86-32 and x86-64)

Application servers

- IBM WebSphere® Application Server V7.0.0.9, and future fix packs
- Apache Tomcat 5.5, and future fix packs

Databases

- DB2 Workgroup Server Edition V9.7, and future fix packs
- DB2 Enterprise Server Edition V9.7, and future fix packs
- Oracle Database 10g Enterprise Edition Release 1, and future fix packs

Web browsers

- Microsoft Internet Explorer 8.0 and future fix packs
- Mozilla Firefox 3.5 and future fix packs
- Mozilla Firefox 3.6 and future fix packs

Supported clients

- IBM Rational Rhapsody V7.6
- IBM Rational Software Architect V8.0.1
- IBM Rational Software Architect V8.0.2

- IBM Rational Software Architect V8.0.3

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Rational Software Architect Design Manager

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one Install of the program, the Authorized User requires a separate entitlement for each such Install. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate User of the program and requires an entitlement as if that device were a person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the program can be licensed. A Floating User is a person who is accessing the program at any particular point in time. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate User of the program and requires an entitlement as if that device were a person.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
Rational Rhapsody Design Manager	5725-D80	L-KHUY-8GDJ5X
Rational Software Architect Design Manager	5725-D79	L-MREI-8GDL7H

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid

for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes. For additional information, refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at
