Updates are available for IBM® Banking and Financial Markets Industry Models V8.4, IBM Banking Industry Models V8.4, IBM Insurance Information Warehouse V8.4.1, IBM Banking and Financial Markets Data Warehouse V8.4, IBM Banking Data Warehouse V8.4, and IBM Banking Process and Service Models V8.4. These updates include:

- Enhanced regulatory support in compliance with the latest Basel II, Basel III, and systemic risk reporting requirements
- Increased coverage for business areas, including cards data management, advanced securities, customer relationship management/multichannel support, and Islamic banking
- New structured content in the form of:
 - Dimensional models based on the standard Kimball dimensional approach
 - Predefined glossary with mappings to the data models

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

Banking and Financial Markets Data Warehouse V8.4, Banking Data Warehouse V8.4, Banking Process and Service Models V8.4, and Insurance Information Warehouse V8.4.1 offer a set of deliverables consisting of various models that are rich in regulatory and business content. These models support clients' efforts to remain compliant with technical regulations and act as an accelerator to deployment. These models provide guidance that enables key roles in a warehouse or service-oriented architecture (SOA) project to better understand what the products' solution deliverables are and how to use them in practice.

The banking sector continues to strive for better reporting, credit, risk, and liquidity management. The Basel Committee on Banking Supervision has released the next iteration of standards known as Basel III, focusing on liquidity risk measurement, standards, and monitoring.

This offering targets regulatory standards that include:

- Basel II: Upgrades existing content based on the directives outlined in Guidelines for Computing Capital for Incremental Risk in the Trading Book and Revisions to the Basel II Market Risk Framework - Final Version.
- Basel III: Focuses on the Federal Financial Institutions Examination Council (FFIEC) 101 and 102 reports.
- Systemic risk: Provides support for systemic risk as outlined in the National Institute of Finance Act of 2010.

New business content is also available in the areas of:

- Multichannel banking/customer relationship management (CRM): Improves channel definition to include various modern banking channels with support for web/mobile analytics and post-click marketing.
- Cards data management: Focuses on the areas of card fees analysis, card loyalty analysis, payment card merchant analysis, individual credit assessment analysis, and payment card fraud analysis.
- Islamic banking: Supports main Islamic banking arrangements, funds and instruments, and Islamic banking profitability analysis.

In addition, Banking and Financial Markets Data Warehouse V8.4 helps clients in the financial markets area to address advanced securities that deliver updated content in the areas of securities, trading status, analytics, and credit rating to handle more complex derivatives.

Banking Process and Service Models V8.4 contains process models that help clients speed up optimization of business processes, compliance projects, and service models, thereby accelerating implementation of new core systems and SOA projects. Banking Process and Service Models V8.4 delivers new business content in the areas of:

- Payments: Targets customer feedback such as payment instruction creation.
- Direct debits: Creates and establishes direct debit mandate based on the SEPA Core Direct Debit Scheme rulebook.
- Cards data management: Supports card process enhancements based on SEPA Cards Framework 2.1 and US Federal Reserve Act: Credit Card Act of 2009 (H.R. 627).

Banking Process and Service Models V8.4 provides process model content in Business Process Modeling Notation (BPMN) 2.0 format. The BPMN 2.0 is a new process modeling standard driven by the Object Management Group (OMG).

Insurance Information Warehouse V8.4.1, Banking and Financial Markets Data Warehouse V8.4, and Banking Data Warehouse V8.4 contain a new Kimball dimensional model approach based on business solution templates to enable IBM Industry Models integration with IBM Netezza® and OLAP environments such as IBM Cognos®.

Banking and Financial Markets Industry Models V8.4 is available as a software bundle of Banking and Financial Markets Data Warehouse V8.4 and Banking Process and Service Models V8.4 to help clients address performance management as well as risk and compliance reporting needs.

Banking Industry Models V8.4 is available as a software bundle of Banking Data Warehouse V8.4 and Banking Process and Service Models V8.4 to help clients accelerate data warehouse projects as well as enterprise data management and governance.

Key prerequisites

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

July 29, 2011

Description

The data models of Banking and Financial Markets Data Warehouse V8.4, Banking Data Warehouse V8.4, and Insurance Information Warehouse V8.4.1 provide model content in InfoSphere® Business Glossary and dimensional model format.

Content in InfoSphere Business Glossary

This new capability offers a wide range of business content that can be deployed in the InfoSphere Business Glossary environment. Clients can leverage predefined content to accelerate their setup activities in InfoSphere Business Glossary while storing, managing, and governing their business terms.

The enhanced model content helps clients drive business value by:

- Supporting reporting requirements (also known as business solution templates), regulatory requirements (also known as *application solution templates*), and a new set of core business terms in native Business Glossary format
- Delivering necessary mappings between various business terms in InfoSphere Business Glossary and predefined mappings to the data models
- Offering detailed guidance on the development activities for using the models across InfoSphere Data Architect and InfoSphere Business Glossary tools

Dimensional models

The dimensional models provide a wide range of industry requirements models (also known as *business solution templates*) in a form that can be used by clients who only want to use data modeling tools such as InfoSphere Data Architect or CA ERwin. Compliant with the standard Kimball dimensional approach, these dimensional models enable clients to deploy a conformed dimensional warehouse. Clients can deploy either the dimensional models or a two-tier warehouse by leveraging dimensional models with linkages back to the existing atomic data warehouse models. The dimensional models are designed to enable automated rapid deployment of the model content to OLAP tools such as IBM Cognos and data warehouse appliances such as IBM Netezza.

Business Object Model (BOM)/Financial Services Data Model (FSDM)

Banking Process and Service Models V8.4 supports BOM/FSDM realignment. This has been an important quality requirement identified by key customers. It focuses on the areas of condition, arrangement, and involved party.

Program number

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Available training offerings include client on-site training, public training at IBM facilities, and remote learning via FlexLearning. Through client on-site training, IBM delivers standard or customized training to meet the requirements of its clients. IBM can also provide mobile academies for a rental fee to minimize clients' setup activities.

IBM public training simplifies the process by providing the complete environment for standard course deliveries and giving students the ability to learn without the distractions of everyday responsibilities. Public training is offered on a regular schedule worldwide. For more information on public instructor-led training, visit

<http://www.ibm.com/software/data/ips/services/learning.html>

The newly enhanced FlexLearning program enables clients to attend training on their own schedule at their own location. This program offers state-of-the-art technology to deliver highly valuable training at minimum cost. All current courses are approximately three hours in length and offer a valuable learn-by-doing, self-paced format.

For more information on any of the training offerings, contact

iiseduc@us.ibm.com

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Specified operating environment

Hardware requirements

Prerequisites

The optimal operating environment for IBM Industry Models includes the following:

- Operating system: Microsoft™ Windows™ XP Professional or Microsoft Windows 7
- Memory: 2 GB

Before you install, ensure that your computer meets the hardware and software requirements.

Hardware requirements

Banking and Financial Markets Industry Models V8.4, Banking Industry Models V8.4, Insurance Information Warehouse V8.4.1, Banking and Financial Markets Data Warehouse V8.4, Banking Data Warehouse V8.4, and Banking Process and Service Models V8.4 do not have specific hardware requirements. Hardware requirements will vary for each customer deployment, depending on the modeling environments used.

Software requirements

Insurance Information Warehouse V8.4.1 is supported in the following software modeling environments:

- Multi Model Mapper (MMM) V3.1 (shipped as part of the product)
 - Microsoft Access 2003/2007 (a prerequisite for MMM)
- CA ERwin Data Modeler V7.3.10.2496
- IBM InfoSphere Data Architect (IDA) V7.5.3

The management of the Insurance Information Warehouse V8.4.1 glossary terms is supported in:

- IBM InfoSphere Business Glossary V8.1.2 and V8.5

The prerequisites for using report samples included with the product are:

- IBM Cognos 8 Business Intelligence V8.4.1
- IBM InfoSphere Warehouse Departmental Base Edition V9.7

Banking Data Warehouse V8.4 and Banking and Financial Markets Data Warehouse V8.4 are supported in the following software modeling environments:

- m1 3.58o (shipped as part of the product)
- CA ERwin Data Modeler V7.3.10.2496
- IDA V7.5.3

The management of the Banking Data Warehouse V8.4 and Banking and Financial Markets Data Warehouse V8.4 glossary terms is supported in:

- IBM InfoSphere Business Glossary V8.1.2 and V8.5

The prerequisites for using report samples included with the product are:

- IBM Cognos 8 Business Intelligence V8.4.1
- IBM InfoSphere Warehouse Departmental Base Edition V9.7

Banking Process and Service Models V8.4 is supported in the following software modeling environments:

- m1 3.58o (shipped as part of the product)
- IBM Rational® Software Architect (RSA) V8.0.2
- RSA for WebSphere® Software V8.0.2
- Software AG ARIS Toolset V7.0.1 (process models only)
- IBM WebSphere Business Modeler V7.0.0.3 (process models only)

In addition, the process models are shipped in BPMN 2.0 format and are supported in IBM and third-party modeling tools that fully support this standard.

Banking and Financial Markets Industry Models V8.4 and Banking Industry Models V8.4 software requirements are the same as those specified for their component offerings described above.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Security, auditability, and control

These products use the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

These products are only available via Passport Advantage. They are not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners.

For more information about IBM Software Value Plus and the authorized portfolio, visit

<http://www.ibm.com/partnerworld/softwarevalueplus>

To locate IBM Business Partners for Software Value Plus, use the Authorized Business Partner Finder tool at

<http://www.ibm.com/software/info/abpfinder/>

Charge metrics definitions

Resource Value Unit (RVU)

RVU is the unit of measure by which this program is licensed. RVU entitlements are based on the quantity of a specific designated measurement for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of RVUs required for your environment as defined by the specific program terms. The RVU entitlements are specific to the program and may include, but are not limited to the following: client devices, data source records, messages, and servers, and may not be exchanged, interchanged, or aggregated with RVU entitlements of another program. To understand these benefits of RVU licensing, and to determine how many RVUs to obtain for the program, contact your IBM representative.

The resource for the purposes of RVU calculation is US\$0.5B of Premium Income. US \$0.5B Premium Income is the total insurance premium income earned rounded up to the nearest half billion of US dollars, as reported in licensee's last annual report or similar public reporting.

RVU conversion table - Premium Income

From 0.5 to 0.5 resources, RVUs per resource = 100 for a maximum of 100 RVUs at this level (cumulative RVUs of 100)
 From 1.0 to 1.0 resources, RVUs per resource = 65 for a maximum of 65 RVUs at this level (cumulative RVUs of 165)
 From 1.5 to 2.0 resources, RVUs per resource = 37 for a maximum of 74 RVUs at this level (cumulative RVUs of 239)
 From 2.5 to 3.0 resources, RVUs per resource = 23 for a maximum of 46 RVUs at this level (cumulative RVUs of 285)
 From 3.5 to 4.0 resources, RVUs per resource = 15 for a maximum of 30 RVUs at this level (cumulative RVUs of 315)
 From 4.5 to 6.0 resources, RVUs per resource = 11 for a maximum of 44 RVUs at this level (cumulative RVUs of 359)
 From 6.5 to 8.0 resources, RVUs per resource = 8 for a maximum of 32 RVUs at this level (cumulative RVUs of 391)
 From 8.5 to 11.0 resources, RVUs per resource = 6 for a maximum of 36 RVUs at this level (cumulative RVUs of 427)
 From 11.5 to 15.0 resources, RVUs per resource = 5 for a maximum of 40 RVUs at this level (cumulative RVUs of 467)
 From more than 15.5 resources, RVUs per resource = 4

The resource for the purposes of RVU calculation is US\$5.0B of Capital Asset Value. US\$5.0B Capital Asset Value is defined as the total capital and other asset value of the licensee rounded up to the nearest \$5B of US dollars, as usually appears on the balance sheet in Licensee's last annual report or similar public reporting.

RVU conversion table - Capital Asset Value

From 5 to 5 resources, RVUs per resource = 24.00 for a maximum of 120 RVUs at this level (cumulative RVUs of 120)
From 10 to 10 resources, RVUs per resource = 14.80 for a maximum of 74 RVUs at this level (cumulative RVUs of 194)
From 15 to 30 resources, RVUs per resource = 8.40 for a maximum of 168 RVUs at this level (cumulative RVUs of 362)
From 35 to 50 resources, RVUs per resource = 4.76 for a maximum of 96 RVUs at this level (cumulative RVUs of 458)
From 55 to 100 resources, RVUs per resource = 3.20 for a maximum of 160 RVUs at this level (cumulative RVUs of 618)
From 105 to 150 resources, RVUs per resource = 2.20 for a maximum of 110 RVUs at this level (cumulative RVUs of 728)
From 155 to 250 resources, RVUs per resource = 1.60 for a maximum of 160 RVUs at this level (cumulative RVUs of 888)
From 255 to 375 resources, RVUs per resource = 1.20 for a maximum of 150 RVUs at this level (cumulative RVUs of 1038)
From 380 to 500 resources, RVUs per resource = 1.00 for a maximum of 125 RVUs at this level (cumulative RVUs of 1163)
From more than 500 resources RVUs per resource = 0.80

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

License Information form numbers

Program name	Program number	Form number
Banking and Financial Markets Data Warehouse	5724-X87	L-CNMY-8F7JAS
IBM Banking Data Warehouse	5724-V39	L-CNMY-8F7HEH
IBM Banking Industry Models	5725-C29	L-CNMY-8F7K7E L-CNMY-8F7HEH
IBM Banking Process and Service Models	5724-V40	L-CNMY-8F7K7E
IBM Banking and FM Industry Models	5725-C82	L-CNMY-8F7JAS L-CNMY-8FYKYE
IBM Insurance Information Warehouse	5724-V43	L-CNMY-8F7FQT

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented

questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No
