Overview

Because the retail store environment is rapidly changing and the need for additional capabilities at the store level is growing, a flexible architecture is even more critical in today's fast moving technology. With WebSphere® Remote Server V7.1.2 and its components, you get eight updated bundles and two new offerings with the latest versions or fix packs of:

- WebSphere Application Server Network Deployment
- DB2® Workgroup Server Edition
- Informix® Growth Edition
- WebSphere MQ
- WebSphere sMash
- WebSphere Message Broker
- WebSphere Enterprise Service Bus
- Tivoli® Composite Application Manager for Applications
- Tivoli Provisioning Manager

WebSphere MQ Telemetry license is available as an add-on license for Retail Store Server Starter Edition, Retail Store Server Starter Edition with Informix Database, Retail Store Server Advanced Edition, and Retail Store Server Advanced Edition with Informix Database editions to inter-connect devices and enterprise applications in a retail environment.

Tivoli Provisioning Manager now includes Tivoli Endpoint Manager for Lifecycle Management (TEM) built on BigFix technology. It streamlines IT operational tasks with a lightweight, single-agent, single-console framework.

WebSphere Remote Server bundles help enable retailers to be more responsive, flexible, and cost efficient in a challenging economy.

WebSphere Remote Server 7.1.2 now includes:

- Retail Store Server Starter Edition V7.1.2
- Retail Store Server Starter Edition with Informix Database V7.1.2
- Retail Store Server Advanced Edition V7.1.2
- Retail Store Server Advanced Edition with Informix Database V7.1.2

- WebSphere Central Site Server V7.1.2
- Tivoli Monitoring and Provisioning Add On for IBM® Retail Store Server Edition V7.1.2
- WebSphere Message Broker Retail Store Edition V7
- WebSphere Enterprise Service Bus Retail Store Edition V7.5.1
- WebSphere MQ Telemetry Retail Store Edition
- WebSphere MQ Telemetry Advanced Retail Store Edition

New in Version 7.1.2

Enhancements to Retail Store Server Starter Edition, Retail Store Server Starter Edition with Informix Database, Retail Store Server Advanced Edition and Retail Store Server Advanced Edition with Informix Database V7.1.2, include:

- Informix Growth Server Edition V11.7
- WebSphere MQ V7.1

Enhancement to WebSphere Central Site Server V7.1.2 includes WebSphere MQ V7.1.

WebSphere Enterprise Service Bus Retail Store Edition is now refreshed and includes WebSphere Enterprise Service Bus V7.5.1.

Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server V7.1.2 is refreshed and includes:

- Tivoli Composite Manager for Applications V6.2.4
- Tivoli Provisioning Manager V7.2.1

The systems management accelerators component is now removed from the bundles.

New in WebSphere Remote Server is the availability of WebSphere MQ Telemetry, providing key technology to deploy smarter messaging with WebSphere MQ. WebSphere MQ Telemetry extends WebSphere MQ so that it can interconnect intelligent enterprise applications, services, and decision makers with networks of instrumented devices connecting enterprises to smart sensors and telemetry devices.

MQ Telemetry capabilities are included in WebSphere MQ V7.1, but require additional licenses for connecting telemetry devices to WebSphere MQ networks. WebSphere MQ Telemetry Retail Store Edition and WebSphere MQ Telemetry Advanced Retail Store Edition offerings provide the licenses which enable these optional telemetry messaging capabilities.

- Examples of telemetry devices include, but are not limited to actuators, appliances, automated teller machines, automatic meter readers, cash registers, disk drives, desktop computers, kiosks, notebook computers, personal digital assistant, point-of-sale terminals, sensors, smart meters, tape drives, and technical workstations.
- The program offers the following types of client device. Each type of client device has corresponding licenses that entitle up to 100 of these devices to connect concurrently into WebSphere MQ networks.
 - MQ Telemetry client - This client provides basic telemetry connectivity.
 - MQ Telemetry Advanced client - This client provides more advanced telemetry connectivity capabilities.

Tivoli Provisioning Manager V7.2.1 now includes Tivoli Endpoint Manager for Lifecycle Management (TEM) built on BigFix technology. It addresses the management challenges of distributed environments with real-time visibility and advanced functionality within a store environment through a single infrastructure, single agent, and single console for systems lifecycle management, including asset

discovery and inventory, software distribution, patch management, and power management.

Customers who purchased IBM Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server and are current with Software Subscription and Support will be entitled to Tivoli Endpoint Manager for Lifecycle Management for use as a supporting program for Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server up to the level of entitlements obtained.

The use of Tivoli Endpoint Manager for Lifecycle Management is applicable to Tivoli Provisioning Manager for server licenses only. If you have Tivoli Provisioning Manager for client licenses, you are not eligible to use Tivoli Endpoint Manager for Lifecycle Management and must purchase Tivoli Endpoint Manager for Lifecycle Management separately.

Customers who purchased Tivoli Provisioning Manager licenses for server management outside of the IBM Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server program should refer to Software Announcement [211-481](#), dated November 29, 2011.

For ordering, contact Your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: YE001

Key prerequisites

For details, refer to the [Hardware and Software requirements](#) sections.

Planned availability date

December 9, 2011 - Electronic software delivery

January 13, 2012 - Media and documentation

Description

Deprecation warnings

In a future release of WebSphere Remote Server, it is expected that the WebSphere sMash feature of the product will be removed.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

WebSphere Remote Server V7.1.2 is capable, as of December 2, 2011, when used in accordance with associated IBM documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested at

http://www.ibm.com/able/product_accessibility/index.html

IBM Retail Store Server Editions

The WebSphere family delivers several software products to help meet your diverse integration needs as they span varying programming models, qualities of service, and multiple data types. Whether you are looking to create a single application or implement an enterprise-wide service-oriented architecture (SOA), IBM designs WebSphere to meet your evolving needs.

The market-leading IBM application integration software including WebSphere Application Server, WebSphere MQ, WebSphere Enterprise Service Bus (ESB), and WebSphere Message Broker helps organizations:

- Quickly and economically address business integration issues
- Become more agile and take rapid advantage of new business opportunities
- Stay flexible
- Maintain client orientation
- Gain competitive position advantage

Retail Store Server Starter Editions combine strategic middleware from WebSphere, DB2, and Informix, with accelerators to provide the core infrastructure for the Retail Integration Framework. Tivoli Monitoring and Provisioning for IBM Retail Store Server offers simplified deployments and early problem detection with monitoring.

Retail Store Server Starter Editions, and their components, are offerings targeted for the new and more demanding store environment that cannot be managed locally by the nontechnical staff. WebSphere MQ Telemetry provides key technology to deploy smarter messaging in a store environment.

Tivoli Monitoring and Provisioning Add On for Retail Store Server

This bundle is an add on to the IBM Retail Store Server Editions. The monitoring capabilities provide superior contextual navigation and knowledge across distributed application resources. It can quickly identify and fix problems before customers are impacted, and help users proactively manage performance requirements to reduce unnecessary labor and capital expenditures. It uses the same infrastructure and UI to extend application performance and availability management coverage to application transactions and web services by adding capabilities in the Tivoli Performance Management suite of products.

Tivoli Provisioning Manager, which is included in the Tivoli Monitoring and Provisioning Add On, manages server lifecycle by helping to reduce labor costs through automation, higher server utilization, enhancing time to market, and helping improve the success rate of new application deployments and changes.

WebSphere ESB Retail Store Edition

WebSphere ESB Retail Store Edition delivers web services connectivity, Java™ Message Service (JMS) messaging, and service-oriented integration for fast implementation and deployment of an ESB without the need for programming.

WebSphere ESB Retail Store Edition helps retail organizations maximize flexibility as an integrated, On Demand Business by:

- Routing messages between services
- Converting transport protocols between requester and service
- Transforming message formats between requester and service
- Handling business events from disparate sources
- Improving time to value with an integrated, interactive, and visual development environment that reduces the need for programming skills

WebSphere Message Broker Retail Store Edition

The WebSphere family of products includes software to help meet your diverse integration needs as they span varying programming models, qualities of service, and multiple data types. Whether you are looking to exchange a limited amount of data or implement an enterprise-wide SOA, you can meet your current and future needs with WebSphere software.

WebSphere Message Broker Retail Store Edition makes full use of the transport and connectivity options from WebSphere MQ and WebSphere Application Server (included in the WebSphere Remote Server Editions). It offers additional routing and transformation capabilities to implement or extend an ESB.

Product extensions offer additional supported function available as a download from the Internet.

These product extensions are available from

<http://www.ibm.com/software/integration/support/supportpacs/>

Market-leading application integration software from IBM, including WebSphere MQ and WebSphere Message Broker, helps you:

- Quickly and economically address business integration issues
- Become more agile and take rapid advantage of new business opportunities
- Stay flexible
- Maintain customer orientation
- Gain competitive position advantage

WebSphere Message Broker Retail Store Edition helps you maximize flexibility as an integrated On Demand Business by:

- Leveraging existing resources much more widely than was part of their original design
- Improving speed of implementation of changes to applications to respond to new opportunities, ensuring that application design and changes are focused on business logic rather than infrastructure details
- Anticipating and rapidly implementing IT changes as your business changes

Education support

IBM training provides education to support IBM offerings world wide.

For additional information, or to check for the latest updates, visit the IBM Education web page at

<http://www.ibm.com/services/learning/>

Select your country to view the available offerings. This site has links to descriptions for all classroom, instructor-led online, and self-study courses available in each country. The web page also contains information on course schedules and enrollment procedures. If you cannot find the information you need on the web page, call IBM Education at 800-IBM-TEACH (426-8322) for additional details or to enroll in a course.

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

A *Quick Start Guide* is shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Limitations

National language versions of the products bundled in this offering are included in the media packs.

The following WebSphere Remote Server Edition is restricted to usage on a single server or virtual server rated at 200 PVUs or less:

- Retail Store Server Starter Edition with Informix Database

The following WebSphere Remote Server Editions are restricted to usage on a single server or virtual server rated at 400 PVUs or less:

- Retail Store Server Starter Edition
- WebSphere Message Broker Retail Store Edition
- WebSphere Enterprise Service Bus Retail Store Edition
- Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server, if Retail Store Server Starter Edition was purchased as a prerequisite

The following WebSphere Remote Server Editions are restricted to usage on a single server or virtual server rated at 480 PVUs or less:

- Retail Store Server Advanced Edition
- Retail Store Server Advanced Edition with Informix Database
- Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server, if IBM Retail Store Server Advanced Edition was purchased as a prerequisite

For additional information, refer to Usage restriction in the [Terms and conditions](#) section of this announcement, or to the license information document that is available on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/slabd.nsf>

Planning information

Packaging

Customers have the following options when ordering WebSphere Remote Server:

- Retail Store Server Starter Edition V7.1.2
- Retail Store Server Starter Edition with Informix Database V7.1.2
- Retail Store Server Advanced Edition V7.1.2
- Retail Store Server Advanced Edition with Informix Database V7.1.2
- WebSphere Central Site Server V7.1.2
- Tivoli Monitoring and Provisioning Add On for IBM Retail Store Server Edition V7.1.2
- WebSphere Message Broker Retail Store Edition V7
- WebSphere Enterprise Service Bus Retail Store Edition V7.5.1

There is no media associated with WebSphere MQ Telemetry Retail Store Edition and WebSphere MQ Telemetry Advanced Retail Store Edition.

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

WebSphere Remote Server uses the security features of the respective operating systems, such as local user registry. The customer is responsible for evaluation and selection of the various WebSphere Remote Server security features, including the implementation of authentication and authorization policies. This responsibility extends to the administration of WebSphere Remote Server security policies and security-related policies external to WebSphere Remote Server, such as the operating environment, network topology and security, and physical security.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU table by processor value, brand, type, and model number at the website below) and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores. The PVU table can be found at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the web page below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the Program, except for those servers from which the Program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the Program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

Client Device

Client Device is a unit of measure by which the program can be licensed. A Client Device is a single-user computing device or special-purpose sensor or telemetry device that requests the execution of or receives for execution a set of commands, procedures, or applications from or provides data to another computer system that is typically referred to as a server or is otherwise managed by the server. Multiple Client Devices may share access to a common server. A Client Device may have some processing capability or be programmable to allow a user to do work. Examples include, but are not limited to, actuators, appliances, automated teller machines, automatic meter readers, cash registers, disk drives, desktop computers, kiosks, notebook computers, personal digital assistants, point-of-sale terminals, sensors, smart meters, tape drives, and technical workstations. Licensee must obtain entitlements for every Client Device that runs, provides data to, uses services provided by, or otherwise accesses the program and for every other computer or server on which the program is installed.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

WebSphere Enterprise Service Bus Retail Store Edition v7.5.1	L-CFIN-8N3P9D

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Note: Carefully read the WebSphere Remote Server V7.1.2 IBM International Program License Agreements listed above. A copy of each is included with the order (hardcopy or electronic format). It may contain terms that supersede the licensed terms included with this program component.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Usage restriction

Yes

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and Technical Support are provided by

the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified clients.
