At a glance

IBM® Server Optimization and Integration Services - server technology assessment - Healthcheck services for System z® analyzes your System z IT infrastructure for potential areas of exposure.

Overview

IBM Server Optimization and Integration Services - server technology assessment - Healthcheck services for System z is designed to provide you with an analysis of your System z IT infrastructure for potential areas of exposure as well as a review of your setup for adherence to best practices. This service helps you identify significant risks and provides you with recommendations to help mitigate those risks. You will receive a report highlighting your System z performance and availability exposures along with recommendations to address the problems or issues identified in the assessment. IBM Server Optimization and Integration Services - server technology assessment - Healthcheck services for System z assesses the following areas:

- z/OS® software inventory
- z/OS maintenance levels and strategy
- z/OS architecture
- z/OS configuration and parameters
- JES2 configuration and parameters
- Parallel Sysplex® configuration and parameters
- DASD and tape
- TCP/IP and communication server
- z/OS catalog infrastructure
- Data facility storage management subsystem settings
- Resource Access Control Facility (RACF®) and Integrated Cryptographic Services Facility (ICSF) configuration

Key prerequisites

**Hardware:** System z890, z990, z9™, z10, or higher

**Software:** z/OS R7 or higher
Availability date

March 31, 2009

Accessibility by people with disabilities

A U.S. Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at
