At a glance

IBM® WebSphere® Application Accelerator for Hybrid Networks V1.0:

- Provides gateway service for enterprise network access to accelerated Software as a Service (SaaS) and public cloud applications
- Works with an appliance-based proxy gateway for hybrid network access
- Consolidates traffic for centralized security policy management such as application access controls, single sign on, and SSL hardware acceleration, in conjunction with the WebSphere DataPower® Edge Appliance XE82
- Enhances reliability of application availability over uncontrolled Internet channels to SaaS, cloud, and Platform as a Service (PaaS) services
- Increases performance for external application access by enterprise network users

Overview

IBM WebSphere Application Accelerator for Hybrid Networks V1.0, a managed service, is designed to provide enhanced reliability, security, and performance to users using externally hosted public cloud infrastructure and third-party Software as a Service (SaaS) applications from their corporate networks.

WebSphere Application Accelerator for Hybrid Networks relies on a downloadable Cloud Proxy on the WebSphere DataPower Edge Appliance XE82.

Key prerequisites

- IBM WebSphere DataPower Edge Appliance XE82

Planned availability date

June 15, 2011

Description

Hosted public cloud and Software as a Service (SaaS) application acceleration

- Reliability - Brings greater reliability and predictability to Internet communications. Using that same network fabric, WebSphere Application Accelerator for Hybrid Networks can:
 - Help extend greater reliability right into the enterprise network
 - Facilitate more reliable access to mission-critical SaaS applications despite uncontrolled Internet performance
- Security - Provides a seamless network gateway between enterprise network users and the SaaS service through WebSphere Application Accelerator network fabric
- Performance - Provides an enhanced user experience to enterprise network users of SaaS applications through Internet acceleration and routing technology over the WebSphere Application Accelerator Internet fabric

Reference information

For information on WebSphere DataPower Edge Appliance XE82, refer to Hardware Announcement [111-115](#), dated June 14, 2011.

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Technical information

Specified operating environment

Hardware requirements

- At least one WebSphere DataPower Edge Appliance XE82
- Workstation supported web browser
- Direct Internet connection

Software requirements

One of the following browsers:

- Windows™ Internet Explorer 6, or later
- Mozilla Firefox 3.6, or later

Control over Domain Name Service (DNS) settings.

Most applications involving SSL require an SSL key for the accelerated application.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Passport Advantage Agreement.

Licensing

The Attachment for Fixed Term Use and the appropriate Terms of Use govern your use of the program. The Cloud Proxy is governed by a third-party End User License Agreement (EULA). You must accept the terms in these agreements to use the service.

For the Attachment for Fixed Term Use visit

http://www.ibm.com/software/lotus/passportadvantage/fixed_term_use_attachment.html

The Terms of Use and the Cloud Proxy EULA are available from your IBM account representative.

IBM includes one year of technical support with the initial program subscription.

Subscription renewal includes technical support.

No

IBM International Passport Advantage Agreement

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Technical Support applies

Yes. Technical Support is included with agreements purchased through Passport Advantage and Passport Advantage Express®. Technical Support is provided as described in the Terms of Use Agreement. Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Technical Support with each program agreement acquired. The initial period of Technical Support can be extended by the purchase of a renewal option, if available.

While your Technical Support is in effect, IBM provides you assistance for your routine, short duration configuration and usage (how-to) questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Technical Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.
