At a glance

Connections Enterprise Content Edition delivers the following capabilities:

- Provides integration of office document management with social collaboration and full content management of both structured and unstructured content.
- Leverages familiar desktop applications to author, share, and collaborate on content anywhere.
- Allows you to manage and securely access all content types, including social and collaborative content.
- Extends your social capabilities and advantages to enterprise and industry environments.

Overview

Connections Enterprise Content Edition V5.1.0 is an integrated solution designed to provide extensive desktop and collaborative application integration between IBM® FileNet® Content Manager, IBM Connections, and IBM Lotus® Quickr® Connectors.

It provides an office document management approach to enterprise content using existing desktop applications. Organizations can now create and leverage enterprise content with familiar applications.

Connections Enterprise Content Edition V5.1.0 leverages powerful social tools and Enterprise Content Management (ECM) capabilities for creation and management of accurate and relevant content. Both office document management and social collaboration are merged into a single environment for management of all content with the same social and enterprise tools.

Connections Enterprise Content Edition V5.1.0 is designed to provide the basis for your enterprise's social content community.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Key prerequisites

Refer to the [Technical information](#) section for information on hardware and software requirements.

Planned availability date

- October 25, 2011: Electronic availability
- November 4, 2011: Media availability

Description

Organizations need enterprise content available and accessible through familiar, easy-to-use office productivity and collaboration tools. Organizations need to properly manage and analyze the volume and variety of content generated as a result of collaboration and social applications. Organizations need to improve the effectiveness and efficiency of their casual business users and information workers. The solution for all these organizational needs is Version 5.1.0.

Connections Enterprise Content Edition, is an integrated solution designed to provide full desktop and collaborative application integration between IBM FileNet Content Manager, IBM Connections, and IBM Lotus Quickr Connectors, providing an office document management approach to enterprise content using existing desktop applications. Using Connections Enterprise Content Edition, organizations can now create and leverage practically all types of content with Wikis, blogs, and common office applications, with full-featured ECM.

Collaborate in a social environment with enterprise content. Share reliable content in real-time, securely. Address your workflow, retention, and compliance needs with familiar desktop applications. Fully manage enterprise social content, such as:

- Corporate profiles and status
- Email and collaborative content
- Project and sales wikis, blogs, activities, and forums

Connections Enterprise Content Edition provides the corporate social collaboration environment to:

- Share files, images, videos, and all types of corporate and social content.
- Collaborate on projects and documents via social tools.
- Leverage corporate profiles and status information.
- Activate networks of knowledgeable business professionals.
- Create relevant and reliable content in real-time.
- Extend social and collaborative capabilities and interfaces to the broader ECM technologies including Business Process Management (BPM), Records, Case Management, and Analytics.

Connections Enterprise Content Edition also provides the key capabilities needed for enabling enterprise content management in a social setting to:

- Leverage familiar desktop applications to author, share, and collaborate on content anywhere.
- Manage and securely access all content types, including social and collaborative content.
- Extend social capabilities and advantages to enterprise environments and industry applications.
- Utilize an open standards approach for repurposing of content.
- Extend your social environment to BPM, analytics, eDiscovery, and other leading-edge ECM technologies.

Connections Enterprise Content Edition V5.1.0 runs on the industry-leading content repository FileNet Content Manager V5.1.0. It leverages ECM performance, scalability, and security. On top of this enterprise base, Version 5.1.0 provides the additional social features needed for ECM users around desktop integration via

the Lotus Quickr Connectors V8.5 and office document management in a social environment with IBM Connections V3.0.1.

Both IBM FileNet Content Manager V5.1.0 and IBM Content Manager Enterprise Edition V8.4.3 customers can purchase discounted add-on licensing to add social capabilities to their ECM environment. Connections Content Edition customers can obtain less restrictive ECM capabilities with discounted trade-up licensing to IBM Connections Enterprise Content Edition.

Connections Enterprise Content Edition V5.1.0 leverages powerful social tools and ECM capabilities for creation and management of accurate and relevant content. Both office document management and social collaboration are merged into a single environment for management of all content with the same social and enterprise tools. It also governs socially created content for records management compliance needs.

Connections Enterprise Content Edition V5.1.0 addresses your needs for social networking, social business, and social content management. It addresses the social changes in how users communicate, how they work, and how we connect people with content. Connections Enterprise Content Edition is the basis for your enterprise's social content community.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

IBM Connections Enterprise Content Edition is capable as of November 4, 2011 , when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/e-business/linkweb/publications/servlet/pti.wss>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware and software requirements

Connections Enterprise Content Edition supports the same hardware as FileNet Content Manager and IBM Connections. Connections Enterprise Content Edition also supports the latest versions of prerequisite software and software add-ons that are supported by FileNet Content Manager and IBM Connections. The exact configuration needed to support your environment with satisfactory response time varies depending on the size of the objects you are working with and other factors. Individual display response times vary depending on workstation speed, memory, size of objects, and network and server workload.

For the most current and complete information on hardware and software requirements for Connections Enterprise Content Edition, visit the FileNet Content Manager, IBM Connections, and Lotus Quickr Connectors hardware and software specifications pages.

Software requirements

Connections Enterprise Content Edition supports the latest versions of prerequisite software and software add-ons that are supported by IBM FileNet Content Manager.

For the most current and complete information on software requirements for IBM FileNet Content Manager, visit

<http://www.ibm.com/support/docview.wss?uid=swg27020447>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Security, auditability, and control

Connections Enterprise Content Edition uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

User Value Unit (UVU)

UVU is the metric by which this program is licensed. UVU entitlements are based on the number of users for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of UVUs required for your environment as defined by the specific program terms. The UVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with UVU entitlements of another software program. UVU licensing offers you price benefits for customers by enabling a lower cost of incremental growth of resources. To understand these benefits of UVU licensing, and to determine how many UVUs to obtain for the program, contact your IBM representative.
