## Overview

IBM® Cognos® Business Intelligence V10.2 enables business users to access and analyze the information they need to improve decision making, gain better insight, and manage performance. IBM Cognos Business Intelligence V10.2 solutions include software for query, reporting, analysis, and dashboards, as well as software to gather and organize information from multiple sources.

Whether you want to deploy business intelligence on a personal, departmental or enterprise wide level, IBM has the solution for you. The IBM Cognos 10 family is right sized for your organization, is integrated, and addresses the business intelligence and performance management needs of the following entities:

- IBM Cognos Insight is for individuals who require personal, desktop analytics.
- IBM Cognos Express® helps departments, business units, or midsize organizations with workgroups who require integrated reporting, analysis, and planning.
- IBM Cognos Enterprise is for enterprises that require broad analytics capabilities deployed to hundreds or thousands of people.

As core component of Cognos Enterprise, IBM Cognos Business Intelligence V10.2 is an integral part of the next wave of innovations for the IBM Cognos 10 family.

IBM Cognos Business Intelligence V10.2 extends its rich capabilities by providing enhanced visualization, integration, deployment, and performance.

## Key prerequisites

Refer to the [Technical information](#) section for details.

## Planned availability date

September 11, 2012: Electronic availability

September 14, 2012: Media availability

## Description

With the ability to interact, search, and assemble all perspectives of your business, IBM Cognos Business Intelligence V10.2 provides a limitless business intelligence (BI) workspace to support how people think and work. It delivers the complete

range of BI capabilities including query and reporting, analysis, dashboarding, and scorecarding on a single, service-oriented architecture (SOA). And it expands traditional BI with planning, scenario modeling, real-time monitoring, collaboration, and predictive analytics that extend your BI capabilities.

IBM Cognos Business Intelligence V10.2 extends its rich capabilities in the following areas.

#### Enhanced visualization

- Full fidelity publish allows a user to publish and share content from IBM Cognos Insight to IBM Cognos Workspace (previously named IBM Business Insight) providing greater insight by incorporating personal analytics along side enterprise content.
- The visualization coach in IBM Cognos Workspace provides automatic chart recommendation that analyses data and produces the most suitable display type helping users save time in determining the best visualization for any given data set.
- Tabbed workspaces with global filtering in IBM Cognos Workspace allow users to gain greater context around information by getting a consistent view across a tabbed workspace.
- Graduated capabilities in IBM Cognos Workspace can help increase user acceptance by providing just the right amount of functionality within the workspace.

#### Enhanced integration

- IBM Cognos Workspace integration with IBM WebSphere® Business Process Management expands the scope of information for decision making by enabling users to pass context from IBM Cognos Workspace to the WebSphere Business Process engine to allow human interaction for review purposes.
- Support for IBM InfoSphere® BigInsights™ provides access to massive amounts of data, including unstructured data with linear scale.

#### Enhanced performance

- Multipage report trickle feed for IBM Cognos Mobile reports (both native application and web application) provides faster time to insight as mobile users can now access and interact with each page as the report loads rather than wait for the entire report to download to the mobile device.
- IBM Cognos Workspace provides a 30 percent increase in search performance ensuring users can search and find even more relevant results faster.
- Dynamic Cubes provide low latency, high performance, in memory online analytical processing (OLAP) analytics over large volumes of data (greater than 1 TB) reducing data movement and computation, and improve responsiveness.

In IBM Cognos Business Intelligence V10.2, IBM Cognos Business Insight and IBM Cognos Business Insight Advanced are renamed IBM Cognos Workspace and IBM Cognos Workspace Advanced, respectively.

### **Accessibility by people with disabilities**

#### **Hardware requirements**

For complete details concerning the minimum hardware requirements to install and run IBM Cognos software, refer to the Installation and Configuration Guide for each product. The Installation and Configuration Guide can be found at

<http://pic.dhe.ibm.com/infocenter/cbi/v10r2m0/index.jsp>

## **Software requirements**

For complete details concerning the minimum software requirements to install and run IBM Cognos software, refer to the Installation and Configuration Guide for each product. The Installation and Configuration Guide can be found at

<http://pic.dhe.ibm.com/infocenter/cbi/v10r2m0/index.jsp>

## **Software environment statement**

IBM Cognos Business Intelligence V10.2 will be the last release to support the IBM Cognos Virtual View Manager component.

- With Cognos Virtual View Manager V10.2, the ability to connect to Oracle, IBM DB2®, Teradata, and Microsoft™ SQL Server data sources remains available but is no longer supported. To be supported, you must use Dynamic Query Mode in Cognos Business Intelligence V10.2 or use Cognos Virtual View Manager V10.1 RP1.
- Support for direct connectivity from Cognos Business Intelligence to Microsoft SQL Server from a UNIX™ or Linux™ platform is now available with Dynamic Query Mode as a standard data source.
- Where Cognos Virtual View Manager was required to connect to supported Enterprise Resource Planning (ERP) vendors, with Cognos Business Intelligence V10.2, you can now directly connect Cognos Business Intelligence to supported ERPs such as Salesforce.com, SAP ECC, and Siebel with Dynamic Query Mode as standard data sources.

IBM Cognos Business Intelligence V10.2 will be the last release to support IBM Cognos Statistics, which will no longer ship with subsequent versions of IBM Cognos Business Intelligence. IBM Cognos Statistics will be supported until the end of life of IBM Cognos Business Intelligence V10.2. For more information about statistical analysis software, visit

<http://www-01.ibm.com/software/analytics/spss/products/statistics/>

IBM Cognos product strategy includes leveraging industry-standard platforms such as operating systems, databases, and application servers. In order to provide the best service possible, IBM certifies each of our products to run on specific versions of these platforms. For complete details concerning supported software environments for IBM Cognos software, visit

<http://www-01.ibm.com/support/docview.wss?uid=swg27014782>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

## **Companion products**

IBM Cognos Data Manager V10.2 (5724-W13) - IBM Cognos Data Manager creates data warehouses and data repositories for reporting, analysis, and performance management.

IBM Cognos Reporting V10.2 (5724-W19) - IBM Cognos Business Intelligence Reporting ensures users are equipped with the information they need to make fact-based decisions in a system that is simpler, faster, and easier to manage.

IBM Cognos PowerPlay® V10.2 (5724-W68) - IBM Cognos PowerPlay is an online analytical processing application that lets you analyze critical corporate data from any angle, in any combination through multidimensional analysis.

## Planning information

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

## Security, auditability, and control

---

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

## Ordering information

---

This product is only available via Passport Advantage . It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

<http://www-01.ibm.com/software/info/itsolutions/softwarevalueplus>

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, contact your IBM representative.

## Charge metrics definitions

### Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

NOTE: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

### Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

[http://www.ibm.com/software/lotus/passportadvantage/pvu\\_licensing\\_for\\_customers.html](http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html)

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores\* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

[http://www.ibm.com/software/lotus/passportadvantage/Counting\\_Software\\_licenses\\_using\\_specific\\_virtualization\\_technologies.html](http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html)

\* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor

core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

## Notes

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only** . In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

IBM Cognos Analytic Server for Business Intelligence Per Processor Value Unit	IBM Cognos Analytic Server 10.1.1 for BI Multiplatform ML Media Pack	B505ZML

**Cross-platform products**

---

***Cross-platform products for use on System z***

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

***Cross-platform product for use on System z IFL engines***

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

---

## Terms and conditions

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

### **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

### **License Information form number**

Program name	Program number	Form number
IBM Cognos Business Intelligence	5724-W12	L-LCOE-8UCREE

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional

technical support from IBM , including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

***Money-back guarantee***

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

***Volume orders (IVO)***

No

***Passport Advantage applies***

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage . It is not available as shrinkwrap.

***Usage restriction***

Yes

For additional information refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

***International Passport Agreement***

***Software Subscription and Support applies***

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

### ***Other terms***

#### ***System i Software Maintenance applies***

No

#### ***Educational allowance available***

Not applicable.

#### **Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

---

## **IBM Electronic Services**

---

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM . Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.
